Project Based Learning – Rating Sheet

Date: _____ Group Name: _____

PROJECT TITLE:			Section:
Team Members Alphabetically Arranged (Format: Surname, Name MI)	Role		INDIVIDUAL GRADE (10%)
		10	
		10	
		10	
		10	
VCLOUD: Network Infrastructure			GROUP GRADE (50%)
1. Network Topology Design - LAN/WAN topology is complete, scalable, secure, and properly documented with logical and physical diagrams		5	
2. Network Services Integration - All network services (DNS, DHCP, FTP, Firewall, Routing, Load Balancing, and Failover) are fully integrated and optimized		5	
3. Routing & Connectivity - All devices communicate correctly across LAN/WAN with proper routing protocols/configuration		5	
4. IP Addressing & Subnetting - Proper IP addressing, subnetting, VLAN segmentation, and routing implemented correctly		5	
CLOUD SERVICES (PLATFORM AS A SERVICE)			
1. Website Deployment - Website is fully deployed online and accessible without errors at all times		10	
2. Login and Security Module - Secure login system with authentication (applies MFA), validation, password protection, role-based access, and error handling functioning perfectly.		5	
3. System Features and Functionality - All required system features are complete, functional, accurate, and user-friendly.		5	
4. Data Analytics Dashboard - Dashboard displays accurate, organized, interactive, and meaningful analytics with charts/graphs.		5	
5. Generated Reports - reports are accurate, complete, downloadable/printable, and well-formatted.		5	
SYSTEM ADMINISTRATION AND MAINTENANCE			GROUP GRADE (30%)
1. Server Roles Configuration - Required server roles like dns, dhcp, file services, group policy, remote desktop, backup and restore are properly installed, configured, secured, and fully operational		10	
2. User and Permission Management - Users, groups, and permissions configured accurately following security best practices		5	
3. Web Server Configuration IIS - Web server properly deploy and set-up in on-premise environment		5	
4. SSL Certificate Implementation – Basic authentication and SSL certificate correctly installed and configured with secure HTTPS communication fully operational		5	
5. Website On-Premise Deployment - Website is fully deployed On-Premise and accessible without errors at all times.		5	
DOCUMENT and OVERALL PRESENTATION			GROUP GRADE (10%)
Problem, objectives, scope, significance, and background are complete, clear, and highly relevant to the overall project. Documentation is complete, clear, well-organized, and properly formatted.		5	
The presentation is confident, professional, and clearly explains the system, process, and results.		5	
TOTAL		100	

Individual Grade Rubric:
10 – Outstanding contribution! Your impact and knowledge are invaluable.
8 – Strong contribution! You have made a significant impact and demonstrated good knowledge.
6 – Satisfactory contribution. There is room for improvement in your involvement and understanding.
3 – Needs improvement. Consider increasing your engagement and deepening your knowledge of the project.

96-100	PASSED
86-95	PASSED with MINOR REVISION
75-85	PASSED with MAJOR REVISION
74 below	REDEFENSE
